Statenweg 80 A1
3039 JH Rotterdam
The Netherlands

Making users work with a product as smoothly as possible, surprising them with the ease with which they achieved a task, making them say: 'Wow, that was easy!'. That's what motivates me.

WORKING EXPERIENCE

2009 to present

Designer / learning consultant at inBrain

I am responsible for the design of (online) learning solutions. This starts at assessing the clients' wishes, then devising a concept, working out a design and the creation of the final product. This can be an animation, e-learning, infographic, game or app, whatever is necessary to facilitate learning.

I have worked on projects for the Dutch Railways, Achmea, the Ministry of internal affairs, ANWB, NN...

I also design the interface for the platforms on which we host the e-learnings. Here participants can sign up, trainers can upload courses and managers can view results.

2007 to 2009

Packaging designer at Sara Lee

At the R&D-department of Household & Body Care I took care of the packaging design of well-known brands, such as Sanex and Radox. This included selecting and briefing design agencies or employing pencil and PC myself.

Continuous

Freelance designer

Irregularly I design logo's, posters, websites or take pictures for people who sometimes pay me for it.

EDUCATION

Delft University of Technology, Industrial Design Engineering, graduated in 2006

In Delft I learned how to design. The design method that is taught here is applicable everywhere to solve problems. My graduation assignment was the design of the interface for an electronic prescription system for the hospital pharmacy.

Courses

Online: Social Psychology, Design Thinking for Innovation (Coursera), Writing training
Offline: Lean Knowledge Management, The Art of Presenting, Personal Leadership

SKILLS

Making complicated things simple

I can distil the essence out of a jumble of information and order it, write it down or present it visually. This is very convenient when designing user interfaces, writing storyboards for animations or e-learning and making infographics.

Software

Adobe CS (fluent at Illustrator and Photoshop), MS Office and authoring tools such as Articulate Storyline, both on Mac and Windows

LANGUAGES

Dutch native

English full professional proficiency

INTERESTS

News junkie	As long as it is not fake
Gadget freak	Hey Siri, turn on the lights!
Photography	Inspiring to do, and to watch
Motorcycling	My Moto Guzzi rides plenty of kilometres
Cycling	Up the mountain
Snowboarding	Down the mountain

✓ Including a healthy dose of perspective

★★★ Imperturbable and stress resistant
